

## How to place your signature above the quoted text (below your reply)

[Follow](#)

By default, Postbox will place your signature below the quoted text, but you can make it place your signature above the quote. There is a separate setting for each account and identity, where you can configure where your signature is placed.

1. In the folder pane, right-click on the account name and select **Settings**.
2. Select the **Composition** panel for that account.
3. Set *and place my signature* to **below my reply (above the quote)**.
